10 / 10

Leadership and Communication.

EDUCATION

Instituto Tecnológico Superior de Apatzingán (ITSA)

I am currently doing my internship as a computer system engineering intern.

2018 - 2022

English course intermediate level B1

I Successfully complete the intermediate English course and an improvement level "JOB-HUNTING" that according to the CEFR is equivalent to B1.

2018-2021

Colegio Nacional de Educación Profesional Técnica Plantel 085 Apatzingán Michoacán.

I finished high school with a bachelor's degree in physics-mathematics and a technical professional bachelor's degree in Computer Science.

2015-2018

SKILLS

Analytical and mathematical skills.

Throughout my career I developed a wide knowledge and ability to solve logical and mathematical problems, thanks to this I was able to compete in different knowledge Olympiads in the branch of mathematics and exact sciences.

Responsibility and organization skills.

I am currently doing my professional residencies with a development team to automate and collect information from an irrigation system at an industrial level, this activity helped me to form a character at the height necessary to become a capable and responsible man, due to this finally, throughout my short life I have been a person who cares those activities and tasks are carried out on time so that no unforeseen event arises, and if there is, to be able to solve it on time.

Skills for working under pressure, teamwork and leadership.

I recently participated in a statewide programming competition called CODING CUP in the city of Lázaro Cárdenas, Michoacán, where my team and I finished in 11th place statewide. In this contest we had to work against the clock to solve the different problems, in addition each one of the team had a different job, in this case, my job was to lead them so that they delegate tasks and that each one deals with a different activity and in that way meet our goal.
